REPORT ON THE PROJECTED DOCK SCHEME When it was lately proposed by Mr. John Forster to transfer his interest in the Dock at Payoda Anchorage to a public company, the community of Foocbox, taking the proposal into consideration, appointed a committee of five gentlemen, for the purpose of investigating the merits of the scheme, and of reporting to the community the result of their investigations. . The Committee so appointed has had two objects in view: 1st, to ascertain the actual condition of the Dock; 2nd, to consider after a careful examination of the books if the scheme were likely to prove a remunerative one. Asfaras the first point is concerned, the com mittee is satisfied that the Dook at Pegoda Anchorage is in excellent order and full worth the value placed upon it. Two competent men uninterested in the scheme, have at the request of the committee, surveyed the Dock thoroughly viz.: Captain Bisbes, Divisional Inspector of the Maritime Customs, and Captain blaw, one of the Surveyors established at the Anchorage, whose report will be found appended, Captain In Davidson, Commander H. M. S. Hornet, has also kindly allowed the use of his name in support of the statement of the above-named goutlemen, having himself taken the trouble to make a careful survey of the property. The Committee has therefore no healtation in endorsing the con-

clusion arrived at by the surveyors, and in declaring themselves satisfied on the first point Regarding the second point, a sub-committee composed of Messrs. Masten and Dalrymple has been deputed to examine the books, and to report to what extent they might find it practicable to reduce the actual expenses of the Dock. Their report shows that during the two years cuding 30th to June last, over which their examination extended, all the coals used for the steamer and at the Dock had been bought at Poschow. The Committee therefore may with confidence affirm that a considerable rex duction might be effected under that head. Tony would have the same opinion to give regarding the purchase of other materials necessary for the working of the Dock, which, it appears from the books, were nearly all purchased in Hongkong and on the spot, at a probable average cost of at least 15 to 20 per cent, above the cost of direct importation. As regards salaries, &c., of the staff, the Committee is satisfied that the reduced scale sanctioned

by the Superintendent, Captain J. C. Skey, can he carried out without impairing the efficiency The Committee is therefore of opinion, that it would not be unreasonable for the shareholders to expect a Dividend of from 15 to 18 per cent. on their investment; and as the capabilities of the Dock became better known, an even larger return might be looked for.

Should the scheme most with sufficient support, it is proposed to form a company with a total capital of \$200,000, to be raised in 2,000 shares of \$100 each, of which \$50 to be called up at once, a further \$25 at the expiration of three months, and the remaining \$25 at the end of six months. With this capital, the actual establishment might be improved, a sei cond and strong Tug-boat might be purchased, and a balance of between \$30,000 to \$35,000 would still remain to work the Dock.

It is handly necessary for the committee to
